DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2, 5-6, 11-12, and 15-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Claim 17 has been rewritten into independent form and is allowable for the reasons previously set forth. Claims 18-20 depend on claim 17 and are therefore allowable by virtue of their dependency.
4. Amended independent claims 1 and 11 have been changed to further require that the three dimensional quadrupole comprises a ring and endcap electrodes. This overcomes the quadrupole of the previously relied upon prior art of Wang et al. (USPN 6,627,883) which teaches a quadrupole composed of rods. The new structure differentiates the instantly claimed device and method over the prior art when taken as a whole with the remaining limitations of the respective claims, but most notably the claimed function of dropping RF potentials applied to the ring and endcap electrodes and applying thereto a DC potential component to expel ions from the quadrupole.
5. This function is disclosed in USPN 6,707,033 to Okumura et al. at Col. 5. However, the inventive entity is identical to the instant claimed invention. Further, the Date of Patent is March 16, 2004, with a filing date of May 28, 2003. Since the reference is not "by another" and does not predate the filing of the instant application by 1 year or more, the reference cannot be used in a rejection.
6. Claims 1 and 11 are therefore allowable over the prior art, and claims 2, 5-6, 11-12, 15-16, and 21-24 are allowable by virtue of their dependency.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
